

CryoLoc™ CTF

Cell Therapy Freezing Bags and Overwraps

Creating Packaging for best Patient Outcomes

CryoLoc™ - Freezing Bags for

Closed Systems

Incorporates sterile dock sections, luers, valves, and other connectivity options for closed contamination free process

Smooth Cell Pathways

Optimized for fluid transfer, reducing areas of cell hang up

Optically Clear Materials

Allows for observation without contamination or disruption

Class VI Materials

Chemically and biologically inert with no plasticizers and DEHP free

Durable at extreme temperatures

Remains flexible in liquid nitrogen, protecting the contents while easily withstanding the freeze-thaw cycle

Lot Number Traceability

Lot numbers on each bag for easy traceability while optional label pocket allows for further content identification

best cell preservation outcomes

Cleanroom to Cleanroom Delivery

Products never leave Class 6 cleanrooms until ready to ship

Highly Customizable Products

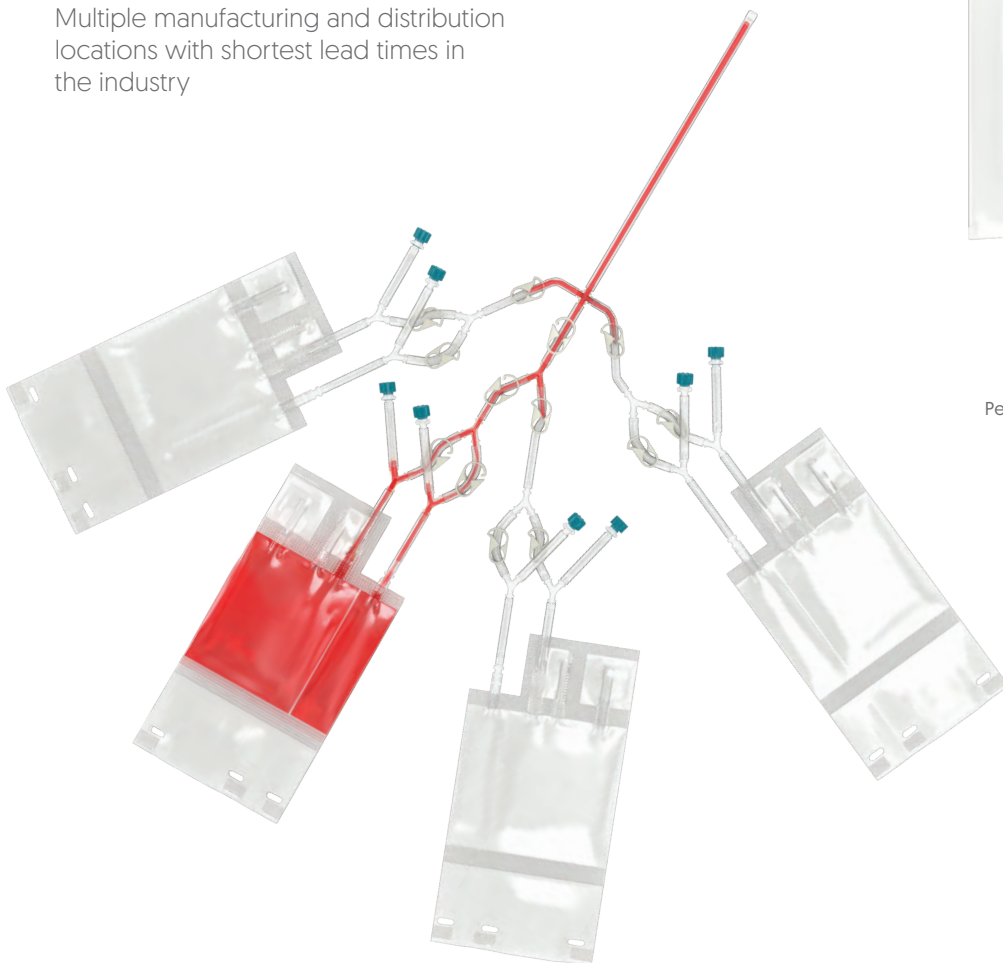

Our highly flexible manufacturing technology allows for product customization to ensure most optimal fit and function for every application

Zero Supply Interruptions

Multiple manufacturing and distribution locations with shortest lead times in the industry

CryoLoc™ Freezing Overwraps
Peelable and non-peelable variations available
