BioLoc™ CCA bags

CryoLoc™ CTF Freezing bags

CryoLoc™ CTF Freezing Overwraps

Creating Packaging for best Patient Outcomes

BioLoc™ CC_N - Non-adherent cell culture bags and tubing sets

These specialty engineered bags pair cutting-edge manufacturing technologies and materials with the newest techniques in material handling and preparation.

Closed Systems

Incorporates sterile dock sections, luers, valves, and other connectivity options for closed contamination free process

Smooth Cell Pathways

Optimized for fluid transfer, reducing areas of cell hang up, maximizing recovery rates

Optically Clear Materials

Allows for observation without contamination or disruption

Class VI Materials

Chemically and biologically inert with no plasticizers and DEHP free

Optimal Culturing Conditions

Materials allow for the best in class gas transmission while offering nearly zero water loss

Custom Tubing Sets

Choose configurations, fittings, and connectors to best optimize your process

Cleanroom to Cleanroom Delivery
Products never leave Class 6 cleanrooms until ready to ship

Standard BioLoc™ CC_N

Series 1 and Series 2 standard sizes available in stock

Highly Customizable Products

Our highly flexible manufacturing technology allows for product customization to ensure most optimal fit and function for every application

Zero Supply Interruptions

Multiple manufacturing and distribution locations with shortest lead times in the industry

Standard BioLoc™ CC_N Sizes

Part No.	Volume (nom)
90-607	3mL
90-608	7mL
90-609	12mL
90-610	30mL
90-611	70mL
90-612	120mL
90-613	200mL
90-614	300mL
90-615	750mL
